B.S. Accounting	Graduation Rate	70.0%
MBA General	Graduation Rate	63.3%
MBA Accounting	Graduation Rate	41.7%
MBA Not-for-Profit Management	Graduation Rate	33.3%

Indicators Used

INDICATOR	DESCRIPTION AND HOW IT WAS CALCULATED
A.A. Graduation Rate	The rate reflects the percentage of students who started the program in the year 2017-2018 and completed in 4 years or less. The group includes 1 st year and transfer students who declared their major within the 2017-2018 year. Associate's Degree graduation rates include associate-seeking students who received a Bachelor's degree within the time period, as well. Students who switched majors but graduated from Chaminade count against this rate, as do students who did not graduate from Chaminade.
B.A. Graduation Rate	The rate reflects the percentage of students who started the program in the 2015-2016 year and completed in 6 years or less. The group includes 1 st year and transfer students who declared their major within the 2015-2016 year. Students who switched

	majors but graduated from Chaminade count against this rate, as do students who did not graduate from Chaminade.
B.S. Graduation Rate	The rate reflects the percentage of students who started the program in the 2015-2016 year and completed in 6 years or less. The group includes 1 st year and transfer students who declared their major within the 2015-2016 year. Students who switched majors but graduated from Chaminade count against this rate, as do students who did not graduate from Chaminade.
MBA Graduation Rate	The rate for each MBA program reflects the percentage of students who started the program in the 2017-2018 year and completed in 4 years or less. The rate does not account for students who switched concentrations. For example, if a student was declared with an Accounting concentration and switched to and graduated as a general MBA, that counts against the Accounting MBA graduation rate but not for the General MBA.
